

# ADVANCED SURGICAL TECHNIQUES AND SHORT IMPLANTS

A ONE DAY COURSE

## COURSE DESCRIPTION

This course will cover innovative surgical techniques and short implants to treat patients with limited bone. Participants will gain an understanding of the indications, treatment planning steps, techniques, healing issues and also the management of potential complications. This course will also address the immediate stabilization technique and preparation of an extraction site using a synthetic bone grafting material and collagen plugs.

**Moderator:** Dr. Mathias Quake  
**Speaker:** Dr. Shadi Daher

Shadi Daher, DMD, FICD, FAAOMS, FIAOMS  
*Assistant Clinical Professor, Oral and Maxillofacial Surgery,  
Boston University Goldman School of Dental Medicine*

Dr. Daher completed his undergraduate studies in Mathematics at the American University of Beirut. He received his DMD degree from Boston University and his Oral and Maxillofacial Surgery training at Boston University and Tufts University. Dr. Daher has been a speaker in many national and international symposia on the topics of dental implant surgery and bone grafting. Dr. Daher is a founding member and the president of "Medical Missions for Children, Inc." and is a Fellow of the International College of Dentistry. Dr. Daher maintains a consultancy practice in OMS in Boston, Massachusetts and is a leading member in multiple national and international professional and honorary societies.
