OPTION ONE: TRANSITIONAL RESTORATION WITH SLEEVE

1. Insert appropriate non-shouldered or stealth shouldered abutment. The diameter of the abutment is dictated by the anatomy of the interdental papillae. The abutment should support the papillae without encroaching upon them.

2. Tap the abutment in the long axis of the abutment post and implant well.

3. Orientate the internal flat(s) of the appropriate temporization sleeve with the external flat(s) of the abutment prior to snapping it onto the abutment.

4. Confirm the appropriateness of the temporization sleeve with a vacuum formed template. Adjust the sleeve as necessary.

5. Inject transitional crown material around the temporization sleeve.

6. Inject transitional material into the vacuum-formed template prior to re-inserting it over the temporization sleeve to form a transitional prosthesis.

7. Remove transitional prosthesis for polishing.

8. Snap the completed transitional prosthesis onto the abutment to facilitate the formation and preservation of an aesthetic soft tissue emergence profile.

OPTION TWO: TEMPORIZATION WITH A TEMPORARY ABUTMENT

At time of uncovering, place a temporary abutment. The abutment will support the soft tissue and assist in the formation of the gingival sulcus. The abutment may be modified to achieve the desired contour. Transitional crowns should not be placed on temporary abutments. See Bicon catalogs for a complete listing of abutment sizes and shapes that are available.

OPTION THREE: A TRANSITIONAL PROSTHESIS IN THE AESTHETIC ZONE

1. Choose appropriately sized temporary abutment. See Option #2 above.

2. Insert temporary abutment into the implant well and gently seat the abutment by tapping on the head of the abutment. Removal of the abutment may be achieved with a variety of extraction forceps.

3. In aesthetic areas, a flipper may be inserted for aesthetics and function while tissue is healing around the temporary abutments. See reverse side for the different types of impressions that may be made after the tissue has healed.
